### ORANGE COUNTY HEALTH CARE AGENCY HAS SUCCESSFULLY ENROLLED OVER 21,000 PATIENTS INTO THE MEDICAL SERVICES FOR INDIGENTS ONLINE ELIGIBILITY DETERMINATION SYSTEM

NEWPORT BEACH, Calif., July 1, 2006 - NetChemistry, a top-tier provider of mission-critical, highly secure software to the Healthcare and Financial Services Sector, today announced that the Orange County Health Care Agency (OCHCA) has completed its first full year of web-based paperless enrollment and eligibility screening for Medical Services for Indigents (MSI).

“Since our launch on July 1, 2005 we have seen the quality and completeness of applications dramatically improve,” said Chris Cruttenden, president of NetChemistry. “The paperless processing of all applications will be the new standard by which all medical services enrollment systems will be measured.”

OCHCA MSI Program is a County run program serving approximately 21,000 eligible patients per year. MSI has a defined scope of services and eligibility criteria, serving adults 18 to 64 years old who have a current medical need, and no other financial resources to pay for those services. Eligibility in MSI is for 12 months at a time for the majority of its patients, with a select number receiving more than 12 months of coverage based on pre-determined medical criteria. MSI payments covers hospital, physician, pharmaceutical, home health, skilled nursing facility and durable medical equipment costs.

“How did we ever live with out it,” said Dan Davis, MSI Program Manager. “This system creates accountability at each step of the process and is more than just an electronic application, it’s an electronic determination system from beginning to end.”

#### About the Core Product Suite

NetChemistry's Core Product Suite allows for rapid system implementations with an emphasis on security, availability, distribution and tracking of secure information. Our seasoned software modules that facilitate processes common to all web-based applications are overlaid with productized industry-specific managers and then finished with client-specific requirements.

#### About MSI

The Medical Services for Indigents (MSI) division of the Health Care Agency acts as a payer to hospitals, clinics, physicians, ambulance companies, home health providers, and other providers that serve eligible indigent patients. Through contracts with hospitals throughout Orange County, MSI administers the MSI Program for necessary medical care to county responsible patients. MSI also administers separate, non-mandated indigent medical services programs. Medical services are provided countywide.

#### About NetChemistry

NetChemistry is an Internet solution and software provider for the Financial and Health Services industry whose systems have handled billions of dollars in transactions. Combining vertical expertise with their Core Product Suite, NetChemistry specializes in Web-based information enrollment, distribution and tracking systems comprised of secure, scalable software modules that can be rapidly customized to fit the different

parameters of each clients offering. The modules are designed to improve customer relationships resulting in efficiency, convenience and reduced liability.

In addition to software development, NetChemistry has a comprehensive understanding of design architecture, systems integration and provides a complete hosting solution at the tier one SBC facility in Southern California.
